# Introduction

For over 40 years, Chancey Metals has delivered balcony rail systems that combine durability, efficiency, and design flexibility. This catalog highlights our latest pre-engineered assembly solutions built to simplify your workflow from specification to installation.

With Chancey's balcony rails, you'll benefit from:

- **Accelerated schedules** with faster lead times
- **Streamlined design** with simplified detailing and specs
- **Reliable performance** backed by decades of proven installations

Every product is engineered to exceed stringent safety, structural, and coating requirements, including High-Velocity Hurricane Zone standards (*Miami-Dade NOA certification pending*).

"Engineered for strength. Designed for speed. Proven for over 40 years."

# About Us

**Headquartered in Jacksonville, FL, Chancey Metals delivers turnkey metal fabrication solutions with a reputation for exceptional value—defined by quality, responsiveness, and cost efficiency.**

As a fully integrated custom metals manufacturer, Chancey Metals offers complete in-house resources to take projects from conceptual design through final assembly. With more than 200 employees and over 200,000 sq. ft. of advanced production space, the Chancey team provides capabilities and capacity unmatched by most competitors.

# Postline Series

The Postline Series delivers durable aluminum balcony rails that combine strength, safety, and modern design. Offered in two-line and three-line configurations, it adapts seamlessly to wall-to-wall, return, or freestanding installations. Sturdy post connections ensure lasting support while preserving a sleek architectural profile. A variety of infill options and finish selections provide design flexibility, making it easy to tailor the system to any architectural vision or project requirement.

# FreeSpan Series

The FreeSpan Series is a clean, minimalist balcony rail system designed for wall-to-wall installations without post connections, making it ideal for short-span balconies. Available in two-line and three-line configurations, this system maintains strength and safety while offering an open, streamlined appearance. With a range of infill options and finish selections, the FreeSpan Series provides the flexibility to match any architectural style or project requirement.
